## Abstrak

Penelitian ini bertujuan untuk menguji pengaruh dari konsentrasi kepemilikan, kepemilikan asing, kepemilikan publik, ukuran dewan direksi dan dewan komisaris, family board membership, direktur dan komisaris independen terhadap kinerja perusahaan. Pengujian penelitian ini dilakukan dengan Ordinary Least Square (OLS) dengan sampel penelitian sebanyak 325 perusahaan yang terdaftar di Bursa Efek Indonesia pada tahun 2019. Penelitian ini menyimpulkan bahwa konsentrasi kepemilikan, kepemilikan asing, ukuran dewan direksi dan dewan komisaris berpengaruh positif terhadap kinerja perusahaan yang diukur menggunakan Return on Assets dan Tobins'Q. Penelitian ini juga menemukan bahwa komisaris independen berpengaruh negatif terhadap ROA dan family on board membership berpengaruh negatif terhadap Tobins'Q. Sedangkan kepemilikan publik dan direktur independen tidak berpengaruh pada kinerja perusahaan yang diukur menggunakan Return on Assets maupun Tobins'Q.

.....This research examines the effect of ownership concentration, foreign ownership, publicly held ownership, board of directors size, board of commissioners size, family on board membership, independent director and independent commissioner on firm performance. This research used Ordinary Least Square (OLS) method with 325 samples of listed company on Indonesian Stock Exchange in 2019. This research concludes that ownership concentration, foreign ownership, board of directors and board of commissioners size has positive impact to firm performance measured by Return on Assets and Tobins'Q. This research also find that independent commissioners have a negative effect on ROA and family on board membership has a negative effect on Tobins'Q. Meanwhile, publicly held ownership and independent director do not effect to firm performance measured by Return on Assets or Tobins'Q.
