**Abstrak**

Apoteker mempunyai peranan penting terutama di apotek, industri farmasi, maupun di pedagang besar farmasi. Untuk menjalankan peran penting tersebut, apoteker harus mempunyai kompetensi yang mumpuni sebagai syarat melakukan praktik kefarmasian. World Health Organization mengeluarkan istilah seven-stars pharmacist concept, yang merupakan peran penting bagi seorang apoteker. Salah satu peran seorang apoteker tersebut adalah life long learner, yaitu apoteker harus selalu memperbarui pengetahuan dan keterampilannya seiring dengan perubahan tren dari waktu ke waktu. Pada kesempatan kali ini, penulis berkesempatan mengikuti Praktik Kerja Profesi Apoteker (PKPA) di Apotek Atrika, PT. Harsen Laboratories, dan PT. SamMarie Tramedifa selama periode bulan Agustus – Desember 2020. Selama PKPA diharapkan calon apoteker dapat meningkatkan wawasannya di dunia kefarmasian sebagai bekal memasuki dunia kerja.

.....Pharmacists have an important role, especially in pharmacy, pharmaceutical industry, and pharmaceutical wholesalers. To carry out this important role, pharmacists must be qualified competencies as a requirement for practicing pharmacy. World Health Organization issued the seven-stars pharmacist concept, which is an important role for a pharmacist. One of the roles of a pharmacist is a life-long learner, where pharmacists must always update their knowledge and skills in line with changing trends from time to time. On this occasion, the author had the opportunity to participate in the Pharmacist Professional Work Practice (PKPA) at Apotek Atrika, PT. Harsen Laboratories, and PT. SamMarie Tramedifa during the period from August - December 2020. During PKPA, it is hoped that prospective pharmacists can improve their horizons in the world of pharmacy as a provision to enter the world of work.
