Abstrak

Praktik Kerja Profesi Apoteker (PKPA) merupakan praktik yang wajib dilaksanakan untuk memperoleh profesi apoteker. Pekerjaan dan pelayanan kefarmasian harus dapat dipahami dan dipraktikkan oleh seorang apoteker. Pelayanan kefarmasian di rumah sakit dan apotek terbagi menjadi pengelolaan sediaan farmasi, alat kesehatan dan bahan medis habis pakai, serta pelayanan farmasi klinik. Pelaksanaan PKPA dilakukan di Rumah Sakit Universitas Indonesia dan Apotek Kimia Farma 143 Margonda. Secara umum selama pelaksanaan PKPA baik di rumah sakit dan apotek sudah memenuhi standar pelayanan kefarmasian sesuai yang tertera dalam PMK sehingga pelayanan yang diberikan kepada pasien dapat berjalan dengan baik dan sesuai dengan pedoman yang telah ditetapkan. Dengan adanya kegiatan PKPA ini, mahasiswa diharapkan mampu menambah wawasan, keterampilan dan ilmu pengetahuan dalam melakukan praktik dan pekerjaan kefarmasian secara langsung.

.....Pharmacist Professional Work Practice is a practice that must be implemented to obtain the pharmacist profession. Pharmacy work and services must be understood and practiced by a pharmacist. Pharmaceutical services in hospitals and pharmacies are divided into the management of pharmaceutical preparations, medical devices and consumables, as well as clinical pharmacy services. The implementation of pharmacist profession practice was carried out at the University of Indonesia Hospital and Kimia Farma 143 Margonda Pharmacy. In general, during the implementation of pharmacist profession practice both in hospitals and pharmacies, they have met the pharmaceutical service standards as stated in the PMK so that the services provided to patients can run well and in accordance with established guidelines. With this pharmacist profession practice activity, students are expected to be able to add insight, skills and knowledge in carrying out pharmaceutical practices and work directly.
