Abstrak

Dalam rantai pemasokan farmasi, obat-obatan yang dibuat dari produsen farmasi atau industri farmasi akan didistribusikan oleh distributor sampai di tangan konsumen melalui pelayanan kefarmasian di fasilitas kesehatan, termasuk Apotek. Penelitian ini memiliki beberapa tujuan, yaitu untuk mengidentifikasi ketidaksesuaian database vendor pada Quality Compliance dengan Approved Vendor List (AVL) di PT. Soho Industri Pharmasi selama periode Juli – Agustus 2021; mengkaji resep obat-obat pada pasien kardiovaskular di Apotek Roxy Cabang Biak periode September 2021, serta pembuatan pembatas antar batch berbeda dalam satu produk di PT Anugerah Phamrindo Lestari cabang Bogor. Pengambilan data diperoleh dari database vendor yang dimiliki oleh Quality Compliance dan Quality Assurance; pembuatan pembatas dilakukan dengan observasi langsung ke Gudang PT Pharmindo Lestari cabang Bogor; serta resep diperoleh dari pengunjung yang melakukan penebusan resep di Apotek Roxy Biak. Hasil penelitian diperoleh yakni kegiatan kefarmasian di PT. Soho Industri Pharmasi khususnya pada Quality Compliance bahwa terdapat gap pada database vendor di Quality Compliance dan AVL; distributor PT Anugerah Pharmindo Lestari memiliki pembatas untuk menghindari terjadinya kesalahan pengambilan produk dengan nomor batch yang berbeda; Apotek Roxy Biak melakukan pekerjaan kefarmasian yang telah sesuai dengan peraturan perundang-undangan yang berlaku, melalui pelaksanaan penyiapan dan pelayanan resep yang diawali dengan skrining resep secara administratif, farmasetik dan klinis, kemudian dilanjutkan dengan dispensing obat.

.....In the pharmaceutical supply chain, medicines made from pharmaceutical manufacturers or the pharmaceutical industry will be distributed by distributors to consumers through pharmaceutical services at health facilities, including pharmacy or drugstore. This study has several objectives, there is to identify the inconsistency of the vendor database on Quality Compliance with the Approved Vendor List (AVL) at PT. Soho Industri Pharmasi during the period July – August 2021; studied the prescription of drugs for cardiovascular patients at the Roxy Pharmacy, Biak Branch for the period of September 2021, as well as the manufacture of barriers between different batches in one product at PT Anugerah Phamrindo Lestari, Bogor branch. Data retrieval is obtained from vendor databases owned by Quality Compliance and Quality Assurance; making the barrier is done by direct observation to the warehouse of PT Pharmindo Lestari Bogor branch; and recipes obtained from visitors who redeem prescriptions at the Roxy Biak Pharmacy. The results obtained are pharmaceutical activities at PT. Soho Industri Pharmasi especially on Quality Compliance that there is a gap in the vendor database in Quality Compliance and AVL; the distributor of PT Anugerah Pharmindo Lestari has a barrier to avoid the occurrence of errors in taking products with different batch numbers; Roxy Biak Pharmacy carries out pharmaceutical work in accordance with applicable laws and regulations, through the preparation and service of prescriptions, beginning with administrative, pharmaceutical and clinical prescription screening, followed by drug dispensing.
