Abstrak

Budidaya lobster merupakan mata pencaharian baru masyarakat Pulau Serangan. Aktivitas ini mulai dilakukan oleh masyarakat Pulau Serangan semenjak dikeluarkannya SK Nomor 53/KEP MEN-KP/2020 tentang Tim Uji Tuntas (Due Diligence) Perizinan Usaha Perikanan Budidaya Lobster oleh Kementerian Kelautan dan Perikanan sebagai langkah untuk menguatkan ekonomi nasional di tengah pandemi covid 19 yang melanda Indonesia. Tesis ini mencermati permasalahan yang berkaitan mengenai isu mata pencaharian masyarakat dan keberlanjutan sumber daya alam di suatu wilayah tertentu. Dengan menggunakan metode penelitian etnografi yang memfokuskan pada konsep akses sebagai kemampuan dan individual adaptability. Tesis ini memperlihatkan keterlibatan dari lembaga, organisasi, dan kebijakan terkait budidaya lobster serta kemampuan akses dan adaptability sebagai strategi saat menghadapi pandemi Covid 19.

.....Lobster cultivation is a new livelihood for Serangan Island community. This activity has been carried out since the issuance of Decree Number 53/KEP MEN-KP/2020 concerning the Due Diligence Team for Lobster Cultivation Fisheries Business Licensing by the Ministry of Maritime Affairs and Fisheries as a step to strengthen the national economy in the midst of COVID-19 pandemic. This thesis examines issues related to community livelihood issues and the sustainability of natural resources in a particular area. By using ethnographic research methods that focus on the concept of access as an ability and individual adaptability. This thesis shows the involvement of institutions, organizations, and policies related to lobster cultivation as well as the ability to access and adaptability as a strategy when facing the Covid 19 pandemic.
