Abstrak

Tenaga Kefarmasian melaksanakan Pekerjaan Kefarmasian di industri farmasi obat, apotek, rumah sakit, ataupun pada pemerintahan seperti di Badan Pengawasan Obat dan Makanan. Penelitian ini memiliki beberapa tujuan, yaitu untuk mengetahui proses pengujian sampel QC serta mengetahui kebutuhan biaya analisa sampel di laboratorium Departemen Quality Control pada PT. Soho Industri Pharmasi selama periode Juli – Agustus 2021; diharapkan dapat menambah pengetahuan dan pengalaman para calon Apoteker sehingga dapat memahami pengawasan Obat dan Makanan yang dilakukan oleh BPOM, serta berkontribusi sebagai seorang apoteker di lingkungan masyarakat; untuk mengetahui kesesuaian resep pasien baik kajian administratif, farmasetik, dan klinis, serta untuk melaksanakan praktik kefarmasian berupa konseling obat terhadap pasien di Apotek Roxy Poltangan, Jakarta Selatan periode 01 – 30 November 2021. Pengambilan data diperoleh dari dokumen prosedur tetap setiap produk finished goods dan raw material and packaging; diperoleh dari seluruh UPT di Indonesia yang diakses melalui SIPT (Sistem Informasi Pengawasan Terpadu); resep diperoleh dari pengunjung yang melakukan penebusan resep di Apotek Roxy Poltangan. Hasil penelitian diperoleh yakni kegiatan kefarmasian di PT. Soho Industri Pharmasi khususnya pada quality control telah sesuai dengan penerapan CPOB dan GMP untuk memastikan hasil produk yang konsisten sesuai persyaratan kualitas, keamanan, dan kemanjuran; Badan POM bertugas untuk melakukan pengawasan Obat dan Makanan sesuai dengan ketentuan peraturan perundang-undangan, dengan berkoordinasi dengan Menteri Kesehatan dan bertanggung jawab kepada Presiden; Apotek Roxy Poltangan melakukan pekerjaan kefarmasian yang telah sesuai dengan peraturan perundang-undangan yang berlaku, melalui pelaksanaan penyiapan dan pelayanan resep yang diawali dengan skrining resep secara administratif, farmasetik dan klinis, kemudian dilanjutkan dengan dispensing obat.

.....Pharmaceutical fields carry out Pharmaceutical Work in the pharmaceutical industry, pharmacies, hospitals, or in government such as the Food and Drug Administration. This study has several objectives, to determine the process of testing QC and the cost of analysis in the laboratory of the Quality Control Department at PT. Soho Industri Pharmasi during the period July – August 2021; increase the knowledge and experience of prospective Pharmacists so that they can understand the supervision of Drugs and Food carried out by BPOM, as well as contribute as a pharmacist in the community; determine the suitability of patient prescriptions for administrative, pharmaceutical, and clinical studies, as well as to carry out pharmaceutical practices in the form of drug counselling to patients at the Roxy Poltangan Pharmacy, South Jakarta for the period 01 – 30 November 2021. Data were obtained from the standard procedure documents for raw materials and packaging finished goods products; obtained from all UPTs in Indonesia which are accessed through SIPT (Integrated Monitoring Information System); prescriptions are obtained from visitors who redeem prescriptions at the Roxy Poltangan Pharmacy.
