Abstrak

Apoteker berperan penting dalam proses pembuatan obat hingga obat dapat digunakan oleh pasien. Apoteker yang baik memerlukan sikap profesional serta kompetensi dalam bekerja yang harus diterapkan dalam proses pembuatan obat hingga proses obat didistribusikan kepada pasien dengan aman dan tepat. Salah satu cara untuk melatih sikap profesional dan kompetensi seorang apoteker dalam bekerja adalah dengan melakukan praktik kerja keprofesian di industri farmasi dan apotek. Praktik Kerja Profesi Apoteker di industri dilakukan di Sanofi Indonesia PT. Aventis Pharma periode Januari – Maret 2022 sedangkan Praktik Kerja Profesi Apoteker di apotek dilakukan di Apotek Kimia Farma 298 Bendungan hilir periode April 2022. Pengalaman bekerja di industri farmasi dan apotek dapat meningkatkan pengetahuan, wawasan, keterampilan, serta sikap profesional yang dibutuhkan sebagai seorang apoteker.

.....Pharmacists have important roles from drug manufacturing process until the drugs can be used by patients. Good pharmacists must have a professional and competent attitude in their work which must be applied in drug manufacturing process until the drugs are distributed to the patients safely and accordingly. One of the ways to train pharmacists' professional and competent attitude is by experiencing professional practice in pharmaceutical industry and pharmacy. The Professional Practice of Pharmacist in pharmaceutical industry is held at Sanofi Indonesia PT. Aventis Pharma in January – February 2022 while Professional Practice of Pharmacist in pharmacy is held at Apotek Kimia Farma 298 Bendungan Hilir in April 2022. The experience of internship in pharmaceutical industry and pharmacy can increase the knowledge, insight, as well as the professional attitude that is required as a pharmacist.
