Abstrak

Praktek Kerja Profesi Apoteker (PKPA) adalah program kerja yang bertujuan untuk membekali mahasiswa calon apoteker mengenai peran, fungsi, dan tanggung jawab apoteker di sarana pekerjaan kefarmasian, yaitu rumah sakit, industri farmasi, apotek, puskesmas, dan Pedagang Besar Farmasi (PBF). Mahasiswa calon apoteker diharapkan memiliki wawasan, pengetahuan, keterampilan, dan pengalaman untuk melakukan pekerjaan kefarmasian secara profesional. Kegiatan PKPA dilakukan di industri farmasi dan apotek, yaitu PT Clinisindo Laboratories dan Apotek Kimia Farma Utama Raya secara berturut-turut. PKPA di PT Clinisindo Laboratories dilaksanakan pada periode Januari - Februari 2022, sementara PKPA di Apotek Kimia Farma Utama Raya dilaksanakan pada periode Maret 2022. Pada PKPA di PT Clinisindo Laboratories, penulis melaksanakan pengkajian terhadap beberapa software yang dapat digunakan dalam sistem manajemen informasi laboratorium, yaitu LabSolution CS, NuGenesis SDMS, dan Agilent SLIMS. Pada PKPA di Apotek Kimia Farma Utama Raya, penulis melaksanakan analisis Pareto ABC dan kegiatan pelayanan farmasi klinik di apotek. Dengan demikian, mahasiswa calon apoteker memperoleh ilmu yang bermanfaat untuk pengabdianya kelak sebagai seorang apoteker yang profesional.

.....Professional pharmacist work practice is a work program that aims to equip prospective pharmacist students about the roles, functions, and responsibilities of pharmacists in pharmaceutical work facilities, namely hospitals, pharmaceutical industries, pharmacies, health centers, and pharmaceutical wholesalers. Pharmacist students are expected to have the insight, knowledge, skills, and experience to do pharmacy work professionally. Professional pharmacist work practice activities are carried out in the pharmacy store and pharmacy industry, namely PT Clinisindo Laboratories and Apotek Kimia Farma Utama Raya, respectively. Professional pharmacist work practice at PT Clinisindo Laboratories was carried out in the period January - February 2022, while professional pharmacist work practice at Apotek Kimia Farma Utama Raya was carried out in the period March 2022. In PT Clinisindo Laboratories, the authors carried out an assessment of several software that can be used in laboratory information management systems, namely LabSolution CS, NuGenesis SDMS, and Agilent SLIMS. In Apotek Kimia Farma Utama Raya, the authors carried out Pareto ABC analysis and clinical pharmacy service activities at pharmacy store. Thus, pharmacist students gain useful knowledge for their future service as a professional pharmacist.
