

The Science of Human Evolution

Langdon, John H., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20528463&lokasi=lokal>

Abstrak

This textbook provides a collection of case studies in paleoanthropology demonstrating the method and limitations of science. These cases introduce the reader to various problems and illustrate how they have been addressed historically. The various topics selected represent important corrections in the field, some critical breakthroughs, models of good reasoning and experimental design, and important ideas emerging from normal science.
