Abstrak

Posyandu (pos pelayanan terpadu), adalah wujud peran serta masyarakat dalam penyelenggaraan upaya kesehatan di Indonesia. Instruksi Menteri Dalam Negeri No. 9 tahun 1990 tentang peningkatan pembinaan mutu Posyandu, memberi peluang kepada lintas program maupun lintas sektoral yang terkait untuk berperan lebih aktif dan terkoordinasi.

Kenyataan di lapangan menunjukkan koordinasi lintas program Dinas Kesehatan Kabupaten Bungo dalam pelaksanaan program-program Posyandu di Kabupaten Bungo tahun 2001, belum berjalan sebagaimana mestinya. Penelitian ini bertujuan untuk mengetahui informasi secara mendalam pelaksanaan koordinasi lintas program Dinas Kesehatan Kabupaten Bungo dalam pelaksanaan program-program Posyandu di Kabupaten Bungo tahun 2001. Metode penelitian yang digunakan adalah kualitatif, untuk mengetahui faktor-faktor penyebab yang melatar belakangi belum efektifnya koordinasi tersebut.

Informasi diperoleh dengan cara wawancara mendalam, diskusi kelompok terarah, dan observasi langsung terhadap informan-informan di Dinas Kesehatan Kabupaten Bungo, serta informan dari tingkat Puskesmas yakni Kepala Puskesmas dan koordinator Penyuluhan Kesehatan Masyarakat.

Hasil penelitian menunjukan bahwa koordinasi lintas program di Dinas Kesehatan Kabupaten Bungo yang berkaitan dengan Posyandu belum efektif. Hal ini disebabkan karena belum adanya perencanaan terpadu tahunan khusus berkaitan dengan program-program yang ada di Posyandu.

Agar koordinasi tersebut memberikan hasil yang lebih besar dan lebih bermanfaat, perlu ditunjuk koordinator yang dituangkan dalam SK Kepala Dinas Kesehatan Kabupaten Bungo. Untuk lebih menyebarluaskan dan pemerataan keberadaan Posyandu di setiap desa, diharapkan Pemerintah Kabupaten Bungo dapat mengalokasikan anggaran yang cukup untuk mendukung kesinambungan Posyandu di tengah-tengah masyarakat.

Analysis of Coordination of Program Crossing In Bungo Regency Health Department On The Programs Implementation of The Integrated Services Post In Bungo Regency Province of Jambi, 2001
Posyandu (integrated services post), as one of the community participation in the implementation of health services,

derives from the society of every village in Indonesia. Based on the Instruction of Home Affairs Minister number 9/h in 1990, on the enhancement, program and sectoral crossing are supposed to be more active in the participation.

The reality shows that the coordination of the program crossing of Bungo Regency Health Department in the programs implementation of Posyandu has not run well. This research is conducted to find out deeply information of the implementation of program crossing coordination in Bungo Regency in 2001. The research method used is qualitative to detect the cause of why coordination has not run. Informations are obtained by having indepth interview, focus group discussion, and observation which are directly done to informants who are directly involved with the available programs in the integrated services post and also, from community health center.

The result of the research shows, that the coordination of the program crossing in Bungo Regency Health Department that is related to the integrated services post has not been effective yet. It is appointed by the planning is not integratedly arranged, especially abaout the program in Posyandu.

In order that the coordination produce more significant and greater result, appointing a coordinator which is enclosed in a Decision Letter from the Head of Health Department of Bungo Regency is a need. To spread out and distribute evenly the existence of the integrated services post in every village, it is expexted that The Regency Government could alocate sufficient budget to reinforce the continuity of the integrated services post.
