Abstrak

Praktik Residensi Keperawatan Medikal Bedah merupakan suatu rangkaian kegiatan megister dan Spesialis Keperawatan yang dilaksanakan di tempat pelayanan Kesehatan. Praktik residensi keperawatan medikal bedah berfokus pada penerapan ilmu, riset dan teknologi keperawatan dalam memenuhi kebutuhan dasar pada pasien dewasa dengan gangguan kardiovaskuler secara komprehensif. Praktik klinik keperawatan medical bedah peminatan kardiovaskuler dilaksanakan di Rumah Sakit Jantung dan Pembuluh Darah Harapan Kita (RSJPHK) Jakarta, dengan pemberian asuhan keperawatan menggunakan pendekatan teori Virginia Henderson pada satu kasus kelolaan dengan diagnose medis UAP TIMI 2/7 GRACE 139 CRUSADE 57, AV Block derajat 1, LBBB ect NSTEMI Dengan Riwayat CABG x2 (SVG-OM, SVG-LAD) dan AVR mekanikAV block grade I dan 30 kasus resume. Penerapan Evidance Based Nursing (EBN) dengan menggunakan intervensi single session 20-minute mindful Breathing untuk mengurangi keluhan dyspnea pada pasien cute Decompensatio Heart Failure (ADHF). Residensi juga melakukan inovasi yaitu penerapan aplikasi assasement pressure injury pada pasien perioperative menggunakan Scale Munro sebagai instrument pencegahan terjadinya pressure injury pada pasien rencana operasi bedah jantung

.....Medical Surgical Nursing Residency Practice is a series of activities for megisters and Nursing Specialists carried out in Health care facilities. The practice of medical surgical nursing residency focuses on the application of science, research and nursing technology in meeting the basic needs of adult patients with cardiovascular disorders in a comprehensive manner. Cardiovascular medical surgical nursing clinical practice is carried out at Heart and Vascular Hospital Harapan Kita (RSJPHK) Jakarta, by providing nursing care using the Virginia Henderson theoretical approach in one managed case with a medical diagnosis of UAP TIMI 2/7 GRACE 139 CRUSADE 57, AV Block degree 1, LBBB ect NSTEMI With History of CABG x2 (SVG-OM, SVG-LAD) and mechanical AVRAV block grade I and 30 cases resumed.

Implementation of Evidence Based Nursing (EBN) using a single session 20-minute mindful breathing intervention to reduce complaints of dyspnea in cute Decompensation Heart Failure (ADHF) patients. The residency also made innovations, namely the application of pressure injury assessment applications in perioperative patients using the Munro scale as an instrument for preventing pressure injury in patients planning cardiac surgery.
