Abstrak

Praktek Kerja Profesi Apoteker PT. Glaxo Wellcome Indonesia bertujuan untuk mengetahui serta mempelajari penerapan CPOB dan peran apoteker di dalam industri farmasi. Melalui praktek kerja profesi apoteker ini dapat diketahui bahwa peran apoteker dalam struktur organisasi PT. Glaxo Wellcome Indonesia tidak hanya terletak pada tiga personil kunci. Apoteker juga memiliki peran pada divisi lainnya, yaitu Technical, Compliance, dan Logistik. Tugas khusus mengenai standar kerja repacking di PT. Glaxo Wellcome Indonesia dilakukan untuk mengetahui tujuan pengembangan standar kerja repacking dan mengidentifikasi pemborosan yang terjadi terkait standar kerja berdasarkan hasil observasi pada proses repacking vaksin. Pemborosan yang teridentifikasi pada kegiatan repacking meliputi defect, waiting, motion dan processing yang menghasilkan variasi proses dan waktu sehingga menyebabkan inkonsistensi proses pada setiap siklus repacking yang dilakukan membantu dalam memastikan konsistensi proses kerja melalui standar kerja yang telah dikembangkan.

..... Practice Pharmacist Profession PT. Glaxo Wellcome Indonesia aims to determine and study the implementation of the GMP and the role of pharmacists in the pharmaceutical industry. Through the practice of a pharmacist's professional work can be seen that the role of the pharmacist in the organizational structure of PT. Glaxo Wellcome Indonesia not only lies in three key personnel. Pharmacists also have a role in other divisions, namely Technical, Compliance, and Logistics. Specific tasks concerning labor standards repacking in PT. Glaxo Wellcome Indonesia was conducted to determine the purpose of developing standards and identify waste repacking work taking place in the working standard is based on the observation on repacking the vaccine. Waste identified in repacking activities include defect, waiting, motion and processing that produces a variety of processes and time, causing inconsistencies in each cycle repacking process conducted assist in ensuring the consistency of the process of working through labor standards that have been developed
