Abstrak

Pelayanan kefarmasian di apotek berperan dalam menjamin kualitas, manfaat, keamanan, dan khasiat dari obat agar dapat melindungi pasien dalam rangka meningkatkan keselamatan pasien. Salah satu kegiatan pelayanan kefarmasian yaitu penyimpanan obat. Ketidakesesuaian pada tahap penyimpanan dapat menimbulkan potensi terjadinya medication error yang berisiko membahayakan pasien. Pengkajian tugas khusus ini dilakukan secara observasional dengan pendekatan secara deskriptif-evaluatif untuk menganalisis kesesuaian penyimpanan obat di Apotek Kimia Farma 003. Observasi dan wawancara yang telah dilakukan kemudian dibandingkan dengan standar penyimpanan obat berdasarkan literatur kemudian dihitung persentase kesesuaian penyimpanan terhadap standar. Berdasarkan hasil penelitian, persentase kesesuaian hasil observasi penyimpanan obat di Apotek Kimia Farma 003 terhadap standar sebesar 80,77%. Secara keseluruhan, penyimpanan obat sudah tergolong kategori “Baik”.

.....Pharmaceutical services in pharmacies play a role in ensuring the quality, benefits, safety and efficacy of drugs in order to protect patients in order to improve patient safety. One of the pharmaceutical service activities is drug storage. Incompatibility at the storage stage can give rise to the potential for medication errors which risk endangering patient safety. This special task assessment was carried out observationally with a descriptive-evaluative approach to analyze the suitability of drug storage at Kimia Farma 003 Pharmacy. The observations and interviews that were carried out were then compared with drug storage standards based on the literature and then the percentage of storage conformity to the standards was calculated. Based on the research results, the percentage of conformity of the results of observations of drug storage at Kimia Farma 003 Pharmacy to standards was 80.77%. Overall, drug storage is classified as "Good".
