Abstrak

Tesis ini membahas skema Penanaman Modal Asing (PMA) di Indonesia pada periode 2004 – 2013 berdasarkan negara asal investasi dan bidang industri. Metode analisis yang digunakan adalah studi kepustakaan, pengumpulan data dari Badan Kordinasi Penanaman Modal (BKPM), dan survey pada pelaku PMA di Indonesia. Hasil analisis menyimpulkan bahwa PMA di sektor primer berkembang dengan pesat, sedangkan sektor tersier menurun drastis. Ditemukan pula adanya PMA yang masuk ke Indonesia melalui *Offshore Financial Centers* (*OFCs*). Terakhir, tesis ini akan menerangkan skema Kerjasama Pemerintah Swasta (KPS), suatu bentuk *public-private partnership* untuk PMA.

.....This thesis performs analysis on foreign direct investment in Indonesia in the period between 2004 and 2013 based on the home country and industrial sectors. Method of analysis employed is literature review, collection of data from Investment Coordination Agency of Indonesia (*BKPM* Indonesia), as well as survey on foreign investors. The analysis concluded that foreign direct investment in primary sector has increased drastically, while the tertiary sector investment is decreasing in significance. A growing trend of FDI inflow to Indonesia through *Offshore Financial Centers* is also identified. Lastly, this thesis will explain KPS scheme, a public-private partnership scheme for foreign investment.
