Abstrak

Skripsi ini membahas mengenai implementasi sistem manajemen keselamatan kontraktor pada perusahaan kontraktor tambang bernama PT. Cipta Kridatama. Penelitian ini dilakukan pada salah satu proyek drilling & blasting PT. Cipta Kridatama yang bertempat di Provinsi Jambi dan dikerjakan oleh sub-kontraktor bernama PT. Hanwha Mining Services Indonesia. Penelitian ini adalah penelitian semi kuantitatif dengan desain deskriptif evaluasi dan berpedoman pada kuesioner penilaian sistem manajemen keselamatan kontraktor Contractor OHS Assessment Tools dari New South Wales Mine Safety Advisory Council, Australia. Hasil penelitian menunjukkan bahwa proyek drilling & blasting PT. Cipta Kridatama - PT. Hanwha Mining Services Indonesia telah memenuhi kriteria nilai total untuk pekerjaan berisiko tinggi di pertambangan dengan rata-rata nilai total sebesar 90,65% dari nilai minimal 80%.

.....This thesis discusses the implementation of contractor safety management in a mining contractor company called PT. Cipta Kridatama. The study was done in one of the PT. Cipta Kridatama drilling & blasting project that placed in Jambi Province and enlisted PT. Hanwha Mining Services Indonesia as its sub-contractor. This study is a semi- quantitative one with a descriptive evaluative design and used the Contractor OHS Assessment Tools from New South Wales Mine Safety Advisory Council, Australia as a guideline. The result of this study showed that the drilling & blasting project that is currently in process by PT. Cipta Kridatama - PT. Hanwha Mining Services Indonesia has already filled the scoring criteria for a high risk contract in mining industry with an average scoring of 90.65% from the minimum score of 80%.
