Abstrak

Obat LASA (Look Alike Sound Alike) adalah obat yang bentuk, warna, tulisan dan pengucapannya nampak mirip. Sedangkan obat high alert adalah obat yang memiliki risiko tinggi dapat menyebabkan kesalahan/kesalahan serius dan menyebabkan dampak yang tidak diinginkan. Maka dari itu diperlukannya pengelolaan yang sesuai terhadap keduanya untuk dapat meningkatkan keamanan dan mencegah terjadinya medication errors. Pengerjaan pengelolaan obat LASA dan high alert ini bertujuan untuk mengetahui gambaran terkait pengelolaan obat LASA dan high alert di ruang farmasi Puskesmas Kecamatan Ciracas dengan menggunakan metode observasional. Berdasarkan hasil pengamatan, disimpulkan bahwa penyimpanan penggolongan obat LASA di ruang farmasi Puskesmas Kecamatan Ciracas terbagi menjadi tiga kategori yaitu mirip ucapan, mirip kemasan, dan nama obat sama kekuatan berbeda yang disimpan di rak terpisah, diberi stiker LASA dan terdapat daftar obat LASA di sekitar rak obat. Sedangkan penyimpanan obat high alert disimpan di rak terpisah, diberi selotip merah, diberi label high alert dan diberi daftar obat kategori high alert di sekitar rak obat. Sehingga pengelolaan penyimpanan obat LASA dan high alert di Puskesmas Kecamatan Ciracas sudah sesuai dengan SOP yang berlaku.

.....

LASA drug (Look Alike Sound Alike) is a drug with appear similar shape, color, writing and pronunciation. Meanwhile, high alert drug is a drug that has a high risk of causing serious errors/mistakes and causing undesirable effects. Therefore, appropriate management of both is needed to increase security and prevent medication errors. Process on management of LASA drug and high alertdrug aims to find out an overview the management of LASA drugs and high alert drug in the pharmacy room of the Puskesmas Kecamatan Ciracas using observational methods. Based on the results of observations, it was concluded that the storage of LASA drug classifications in the pharmacy room of Puskesmas Kecamatan Ciracas was divided into three categories, namely similar to speech, similar to packaging, and names of drugs with different strengths which were stored on separate shelves, given LASA sticker and there was a list of LASA drugs around the drug shelf. Meanwhile, the storage of high alert drug were stored on separate shelves, covered with red tape, given high alert sticker and there was a list of high alert drugs around the drug shelf. So that the management of LASA drug and high alert drug in the pharmacy room of the Puskesmas Kecamatan Ciracas is in accordance with the applicable SOP.
