**Abstrak**

Pelayanan Kefarmasian di Rumah Sakit adalah salah satu bagian penting dalam sistem pelayanan kesehatan Rumah Sakit yang berfokus pada pengelolaan Sediaan Farmasi, Alat Kesehatan, dan Bahan Medis Habis Pakai serta pelayanan farmasi klinik. Rumah Sakit Universitas Indonesia (RS UI) menyediakan berbagai fasilitas dan pelayanan kesehatan, salah satunya yaitu Unit Central Operation Theater (COT) yang berfokus pada penyediaan layanan prosedur tindakan operasi atau pembedahan, salah satunya yaitu tindakan CAG/PCI. Tindakan CAG/PCI adalah rangkaian tindakan terhadap jantung. Depo Instalasi Farmasi OK (Operatio Kamer) berperan dalam mendukung kegiatan unit COT dengan menyediakan berbagai paket kebutuhan tindakan operasi. Penelitian ini bertujuan untuk mengevaluasi penggunaan standar paket tindakan CAG/PCI yang telah disiapkan untuk mengoptimalkan efisiensi dan efektivitas pelayanan dan pengelolaan sediaan farmasi di unit farmasi OK RS UI. Pengambilan data dilakukan secara retrospektif menggunakan data periode Juni – Agustus 2023. Data kemudian diolah menggunakan Microsoft Excel dan dinilai kesesuaianya per pasien, per item, dan per bulan. Hasil analisis menunjukkan bahwa penggunaan item tindakan CAG/PCI pada 77 tindakan pasien tidak sesuai dengan paket standar. Penggunaan 14% item paket standar telah sesuai dengan jumlah pada paket standar, sedangkan 51% item melebihi paket standar dan 35% lainnya di bawah paket standar. Selama bulan Juni – Agustus 2023, penggunaan item untuk tindakan CAG/PCI melebihi dari paket standar.

Pharmaceutical services in hospitals are an important part of the hospital health service system which focuses on the management of pharmaceutical supplies, medical devices and consumable medical materials as well as clinical pharmacy services. The University of Indonesia Hospital (Rumah Sakit Universitas Indonesia) provides various health facilities and services, one of which is the Central Operation Theater (COT) Unit which focuses on providing surgical procedures or surgical procedures, one of which is CAG/PCI procedures. The OK (Operatio Kamer) Pharmacy Unit plays a role in supporting the activities of the COT unit by providing various packages of operational needs. This study aims to evaluate the use of the standard CAG/PCI action package that has been prepared to optimize the efficiency and effectiveness of service and management of pharmaceutical preparations in the OK UI Hospital pharmacy unit. Data collection was carried out retrospectively using data for the period June – August 2023. The data was then processed using Microsoft Excel and assessed for suitability per patient, per item and per month. The results of the analysis showed that the use of CAG/PCI action items in 77 patient procedures was not in accordance with the standard package. The use of 14% of standard package items is in accordance with the amount in the standard package, while 51% of items exceed the standard package and the other 35% are below the

standard package. During June – August 2023, item usage for CAG/PCI actions exceeds that of the standard package.
