Abstrak

Pelayanan kefarmasian di instalasi rumah sakit dilakukan sesuai standar pelayanan kefarmasian yang telah ditetapkan sebagai pedoman apoteker dalam menjalankan profesinya. Salah satunya terkait pengelolaan sediaan farmasi dan bahan medis habis pakai dengan tujuan menganalisis kesesuaian tempat penyimpanan sediaan farmasi dan bahan medis habis pakai. Analisis dilakukan dengan cara membandingkan hasil observasi terhadap standar penyimpanan obat dan bahan medis habis pakai dan ditemukan hasil bahwa penyimpanan obat dan bahan medis habis pakai sudah sesuai dengan standar yang telah ditetapkan. Sistem penyimpanan sediaan farmasi dan bahan medis habis pakai yang telah tepat diharapkan membantu pelayanan obat dapat dilaksanakan secara tepat guna dan hasil guna.

.....

Pharmaceutical services in hospital installations are carried out in accordance with pharmaceutical service standards that have been set as guidelines for pharmacists in carrying out their profession. One of them is related to the management of pharmaceutical preparations and consumable medical materials with the aim of analyzing the suitability of storage places for pharmaceutical preparations and consumable medical materials. The analysis was carried out by comparing the observation results against the storage standards of medicine and consumable medical materials and found that the storage of medicine and consumable medical materials was in accordance with the standards that had been set. The right storage system for pharmaceutical preparations and consumable medical materials is expected to help medicine services be carried out appropriately and effectively.
