Abstrak

Kegiatan Praktik Kerja Profesi Apoteker (PKPA) di Kimia Farma Yusuf Depok bertujuan untuk memahami tugas, wewenang dan tanggung jawab apoteker dalam merencanakan sediaan farmasi dengan ketersediaan sediaan farmasi dengan jenis yang tepat, jumlah yang tepat, tepat waktu dan efisien. Perencanaan persediaan obat di apotek penting untuk dikelola dengan baik agar persediaan obat tidak berlebihan atau tidak mencukupi. Apotek Kimia Farma Yusuf Depok merupakan apotek yang melayani dan menyediakan berbagai jenis sediaan farmasi, alat kesehatan dan bahan medis habis pakai (BMHP). Penyediaan berbagai sediaan obat di Apotek Kimia Farma Yusuf Depok seperti analgesik, kardiovaskular, dislipidemia, topikal, antibiotik, dan lain-lain. Mengingat banyaknya jenis obat yang harus tersedia namun dana farmasi terbatas, maka perlu direncanakan sediaan farmasi berdasarkan anggaran dan prioritas di apotek Penggunaan metode konsumsi ABC dan metode pareto diharapkan mampu memprediksi perencanaan kebutuhan obat, memberikan informasi dalam rangka prioritas pengadaan dan membantu perencanaan sediaan farmasi pada periode berikutnya, meminimalkan kesalahan dalam perencanaan dan pengendalian sediaan farmasi secara efektif.

.....
