## Abstrak

Penelitian ini menganalisis hubungan pendidikan dan partisipasi tenaga kerja perempuan di Jawa Barat. Penulis menemukan bahwa pendidikan berdampak negatif dengan signifikansi 1% terhadap partisipasi tenaga kerja perempuan di Jawa Barat. Hasil survei Angkatan Kerja Nasional Tahun 2018–2022 digunakan untuk metode kuantitatif yang menerapkan model Binary Logistic Regression. Selain itu, status pernikahan dan status KRT berdampak positif pada partisipasi tenaga kerja perempuan di Jawa Barat. Penulis juga menemukan bahwa faktor-faktor seperti jenis instansi dan gaji berdampak pada partisipasi tenaga kerja perempuan. Untuk mendukung temuan kuantitatif, penulis menggunakan analisis kualitatif yang mencakup survei kuesioner dan wawancara mendalam.

.....This study analyses the relationship between education and female labour force participation in West Java. The author found that education has a negative impact with 1% significance on female labour force participation in West Java. The results of the 2018-2022 National Labour Force survey were used for the quantitative method that applied the Binary Logistic Regression model. In addition, marital status and household head status have a positive impact on female labour force participation in West Java. The authors also found that factors such as agency type and salary have an impact on female labour force participation. To support the quantitative findings, the authors used qualitative analysis that included a questionnaire survey and in-depth interviews.
