Abstrak

Latar Belakang : Special Care Dentistry adalah cabang ilmu kedokteran gigi mengenai kesehatan gigi dan mulut untuk orang-orang dengan berbagai kondisi medis atau keterbatasan yang memerlukan perawatan khusus. Studi mengenai persepsi dokter gigi terhadap Special Care Dentistry sudah dilakukan di Jakarta, sehingga studi mengenai persepsi mahasiswa terhadap Special Care Dentistry khususnya di Fakultas Kedokteran Gigi Universitas Indonesia perlu dilakukan. Tujuan : Mengetahui perbedaan persepsi mahasiswa Fakultas Kedokteran Gigi Universitas Indonesia terhadap Special Care Dentistry. Metode : Penelitian ini menggunakan self-administered questionnaire melalui google form di 2021. Data dianalisis menggunakan perangkat lunak statistik SPSS dengan uji Chi-Square. Hasil Penelitian : dari seluruh mahasiswa Fakultas Kedokteran Gigi Universitas Indonesia tahun angkatan 2015-2021 didapatkan 572 mahasiswa yang berpartisipasi dalam penelitian ini dengan response rate 70%. Sebagian besar responden mengetahui adanya Special Care Dentistry spesialisasi melalui internet. Sebagian besar mahasiswa merasa netral dalam memberikan perawatan pasien seperti itu. Sebagian besar mahasiswa setuju bahwa mereka harus menerima pelatihan didaktik dan klinis dalam pendidikan dokter gigi. Sebagian besar mahasiswa juga menyatakan minat untuk mengikuti pelatihan Special Care Dentistry pascasarjana. Kesimpulan : Mahasiswa Fakultas Kedokteran Gigi Universitas Indonesia yang terlibat dalam penelitian ini memiliki persepsi cenderung baik terhadap Special Care Dentistry dan merasa netral dalam memberikan perawatan kepada pasien special care.Background: Special Care Dentistry is a branch of dentistry concerning dental and oral health for people with various medical conditions or limitations that require special care. A study on dentists' perceptions of Special Care Dentistry has been carried out in Jakarta, so a study on student perceptions of Special Care Dentistry, especially at the Faculty of Dentistry, University of Indonesia needs to be done. Objective: To find out the different perceptions of students from the Faculty of Dentistry, University of Indonesia towards Special Care Dentistry. Methods: This study used a self-administered questionnaire via google form in 2021. Data analysis used SPSS statistical software with Chi-Square test. Results: From all students of the Faculty of Dentistry, University of Indonesia in years of 2015-2021, 572 students participated in this study (response rate 70%). Most of the respondents know that there is a Dentistry Specialization through the internet. most students feel neutral in providing care to such patients. Most students agree that they should receive didactic and clinical training in dental education and also expressed interest in participating in postgraduate Special Care Dentistry training. Conclusion: Students of the Faculty of Dentistry, University of Indonesia who were involved in this study had a favorable perception of Special Care Dentistry and felt neutral in providing care to special care patients.
