Abstrak

Penelitian ini membahas tentang peran keselamatan dan kesehatan kerja pada penanganan pandemi COVID-19 di hulu migas. Desain penelitian yang digunakan ialah deskriptif analitik dengan pendekatan kualitatif. Pengumpulan data didapatkan berdasarkan hasil wawancara mendalam dengan beberapa narasumber di sektor hulu migas. Analisis data dilakukan dengan melihat gambaran peran keselamatan dan kesehatan kerja pada penanganan pandemi COVID-19 di hulu migas meliputi peran dan tantangan K3, guidance atau pedoman COVID-19, alur koordinasi dan komunikasi, kesiapsiagaan awal masuknya pandemi COVID-19, serta efektivitas penanganan pandemi COVID-19 di sektor hulu migas. Penanganan pandemi COVID-19 di hulu migas berdasarkan teori hierarki pengendalian yaitu pengendalian engineering, administrasi, dan alat pelindung diri (APD). Selain itu, dilakukan juga analisis perbandingan dari masing-masing perusahaan narasumber yaitu PT XYZ (Oil and Gas Company), Pertamina Persero, dan PT X (Service Company).This study discusses the role of occupational health and safety in handling the COVID-19 pandemic in upstream oil and gas. The research design used is descriptive analytic with a qualitative approach. Data collection was obtained based on the results of in-depth interviews with several sources in the upstream oil and gas sector. Data analysis was carried out by looking at the description of the role of occupational health and safety in handling the COVID-19 pandemic in upstream oil and gas including the roles and challenges of OHS, COVID-19 guidance or guidelines, coordination and communication flows, early preparedness for the entry of the COVID-19 pandemic, as well as the effectiveness of handling the pandemic. COVID-19 in the upstream oil and gas sector. The handling of the COVID-19 pandemic in upstream oil and gas is based on the control hierarchy theory, namely engineering control, administration, and personal protective equipment (PPE). In addition, a comparative analysis was also conducted of each of the resource companies, namely PT XYZ (Oil and Gas Company), Pertamina Persero, and PT X (Service Company).
