Abstrak

Apoteker adalah profesi yang telah diakui oleh perundang-undangan yang memiliki peran sebagai tenaga kesehatan selain Dokter, Dokter Gigi, Perawat, dan Bidan. Salah satu sarana pelayanan kesehatan yang dapat diakses masyarakat secara langsung yaitu Rumah Sakit. Rumah Sakit adalah penyelenggaraan pelayanan kesehatan yang meliputi rawat jalan, rawat inap, dan layanan gawat darurat. Praktik profesi dilakukan sebagai bentuk pengenalan kepada mahasiswa agar dapat memahami secara langsung penerapan ilmu manajemen di instalasi farmasi dan ilmu farmasi klinis. Tak hanya itu, peran Apoteker dalam manajemen sterilitas alat kesehatan di instalasi CSSD (Central Sterile Supply Departement) juga diperlukan demi mewujudkannya pelayanan kesehatan yang aman dan optimal. Praktik kerja profesi Apoteker dilaksanakan di Rumah Sakit Universitas Indonesia pada periode 11 Januari hingga 5 Maret 2021. Rumah Sakit tersebut dapat menjadi wadah bagi seorang calon apoteker dalam mengimplementasikan ilmu yang telah disampaikan oleh para dosen dan praktisi melalui perkuliahan sebelumnya. Peran apoteker di Rumah Sakit tersebut sangat beragam mulai dari unit pergudangan, produksi, rawat jalan, rawat inap, gawat darurat, produksi steril-non steril, perencanaan, pengadaan, OK (Operation Kamer), dan sterilisasi. Kegiatan yang umumnya dilakukan meliputi penyimpanan obat, pemusnahan, pencatatan, pelaporan, kaji resep, dispensing, pemantauan terapi obat, monitoring efek samping obat, konseling, dll. Ilmu yang didapatkan setelah kegiatan tersebut dapat menjadi bekal bagi para calon Apoteker dalam menjalani pekerjaannya setelah lulus dikemudian hari. Apoteker adalah profesi yang telah diakui oleh perundang-undangan yang memiliki peran sebagai tenaga kesehatan selain Dokter, Dokter Gigi, Perawat, dan Bidan. Salah satu sarana pelayanan kesehatan yang dapat diakses masyarakat secara langsung yaitu Apotek. Apotek merupakan tempat praktik profesi kefarmasian yang juga dapat menjadikan apoteker menjalani peran sebagai entrepreneur. Praktik profesi dilakukan sebagai bentuk pengenalan kepada mahasiswa agar dapat memahami secara langsung penerapan ilmu manajemen Apotek dan ilmu farmasi klinis. Praktik kerja profesi Apoteker dilaksanakan di Apotek Roxy Jatibaru pada periode 6-30 April 2021. Apotek tersebut dapat menjadi wadah bagi seorang calon apoteker dalam mengimplementasikan ilmu yang telah disampaikan melalui perkuliahan sebelumnya. Kegiatan yang dilakukan meliputi penyimpanan obat, pemusnahan, pencatatan, pelaporan, kaji resep, dispensing, pemantauan terapi obat, monitoring efek samping obat, konseling, dll. Ilmu yang didapatkan setelah kegiatan tersebut dapat menjadi bekal bagi para calon Apoteker dalam menjalani pekerjaannya setelah lulus dikemudian hari.

.....Pharmacists are professions that have been recognized by legislation that have a role as health workers other than doctors, dentists, nurses, and midwife. One of the health service facilities that can be directly accessed by the community is the hospital. Hospital is the organization of health services which include outpatient, inpatient, and emergency services. Professional practice is carried out as a form of introduction to students so that they can directly understand the application of management in pharmacy installations and

clinical pharmacy science. Not only that, the role of pharmacists in the management of sterilization of medical devices in the CSSD (Central Sterile Supply Department) installation is also needed for save and optimal health services. The pharmacists professional practice was held at the Universitas Indonesia Hospital in the period January 11th to March 5th, 2021. The hospital can be a place for prospective pharmacists to implement the knowledge that has been conveyed by lecturers and practitioners through previous lectures. The role of pharmacists in the hospital is very diverse, ranging from warehousing, production, outpatient, inpatient, emergency, sterile-non sterile production, planning, procurement, OK (Kamer Operation), and sterilization. Activities that are generally carried out include drug storage, destruction, recording, reporting, review of prescriptions, dispensing, monitoring of drug therapy, monitoring of drug side effects, counseling, etc. The knowledge gained after these activities can be a provision for prospective pharmacists in carrying out their work after graduation in the future.

Pharmacists are professions that have been recognized by law that have a role as health workers other than doctors, dentists, nurses, and midwife. One of the health service facilities that can be directly accessed by the community is a pharmacy drug store. Drug store are places for practicing the pharmaceutical profession which can also make pharmacists carry out their roles as entrepreneurs. Professional practice is carried out as a form of introduction to students so that they can directly understand the application of pharmacy management and clinical pharmacy science. The pharmacist's professional practice was held at the Roxy Jatibaru Drug Store in period of April 6th until 30th, 2021. It can be a place for a prospective pharmacist to implement the knowledge conveyed through previous lectures. The activities that have been done were drug storage, destruction, recording, reporting, review prescriptions, dispensing, monitoring drug therapy, monitoring drug side effects, counseling, etc. The knowledge gained after these activities can be a provision for prospective pharmacists in undergoing time after graduation in the future.
