Abstrak

This paper narrates the idea of public space after and during COVID-19. It is constructed on two main things, which are the history of public space planning to cover the idea of public space in the past, and the current condition during COVID-19 as the newest data resource. The smart city idea is injected to give the notions of narrative research in regards to the correlation of the ICT Developments, its usage in relations to the public space planning development, and the increasing numbers of subjects that are using ICT Tools in the prevention of COVID-19. However, this narrative finds other interesting findings that there are big disjuncture between the idea of Smart City in multiple stakeholders and its interrelation during the public space planning activities.

.....Ruang publik merupakan hal yang cukup diperhatikan dalam konteks COVID-19. Penerapan berbagai kebijakan dan insentif menyebabkan perubahan kondisi ruang publik di berbagai negara. Dalam tulisan akan dibahas mengenai penggambaran kondisi mengenai ruang publik saat dan sesudah COVID-19. Sejarah ruang publik menceritakan kondisi sebelum COVID-19 dan kondisi terkini mengenai ruang publik dalam kondisi COVID-19. Pengertian mengenai kota pintar lalu digabungkan menjadi penelusuran terkait dengan korelasi antara peningkatan ICT terhadap penciptaan ruang publik dan penggambaran naratif tentang apa yang terjadi dalam konteks kota pintar dalam penciptaan ruang publik sebelum, sesudah dan sesaat COVID-19. Di dalam naratif ditemukan bahwa adanya celah yang cukup besar antara pengertian kota pintar di dalam berbagai konteks subjek.
