Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=9999920567182&lokasi=lokal>

Abstrak

Telah dilakukan penelitian analitik deskriptif yang dilakukan secara cross sectional dengan menggunakan data sekunder terhadap 59 kasus Hidrosefalus yang ditegakkan melalui hasil CT Scan atau MRI, kemudian dilakukan tindakan operasi pemasangan pirau di RSCM selama periode 2003-2007. Penelitian ini bertujuan melihat korelasi antara Evan's ratio dengan tekanan intraventrikel saat operasi.

.....A descriptive analytical study has been carried out in a cross-sectional manner using secondary data on 59 cases of Hydrocephalus which were established through CT Scan or MRI results, then surgical procedures were carried out to install the diarrhoea at the RSCM during the period 2003-2007. This study aims to see the correlation between Evan's ratio and intraventricular pressure during surgery.
