Abstrak

Puskesmas merupakan fasilitas pelayanan kesehatan yang menyelenggarakan upaya kesehatan masyarakat dan upaya kesehatan perseorangan tingkat pertama, dengan lebih mengutamakan upaya promotif dan preventif di wilayah kerjanya. Pelayanan kefarmasian di Puskesmas memuat berbagai macam aktivitas baik pengelolaan sediaan farmasi dan Bahan Medis Habis Pakai (BMHP) serta pelayanan farmasi klinik yang harus dilaksanakan. Kegiatan pelayanan kefarmasian mengenai pengelolaan sediaan farmasi dan BMHP yaitu salah satunya evaluasi pengelolaan sediaan farmasi dan BMHP terhadap kesesuaian dan ketersediaannya. Tujuan dari tugas khusus ini adalah memahami peran apoteker dalam melakukan evaluasi pengelolaan sediaan farmasi dan bahan medis habis pakai di Puskesmas Pasar Rebo terhadap kesesuaian dan ketersediaan bahan gigi di poli gigi. Hasil menunjukkan bahwa Apoteker dapat berkontribusi memantau dan mengevaluasi kesesuaian bahan gigi di Puskesmas Pasar Rebo, dimana adanya 14 tindakan gigi dan ketersediaan bahan-bahan gigi pernah terjadi kekosongan stok pada 4 bahan gigi. Adanya peran Apoteker dalam mengelola bahan gigi dapat membantu terhindarnya kekosongan atau kelebihan stok.

.....The Community Health Center is a health service facility that organizes public health efforts and first-level individual health efforts, by prioritizing promotive and preventive efforts in its work area.

Pharmaceutical services at the Community Health Center include various activities, both the management of pharmaceutical preparations and Medical Consumables (BMHP) and clinical pharmacy services that must be implemented. Pharmaceutical service activities regarding the management of pharmaceutical preparations and BMHP include the evaluation of the management of pharmaceutical preparations and BMHP for their suitability and availability. The purpose of this special task is to understand the role of pharmacists in evaluating the management of pharmaceutical preparations and medical consumables at the Pasar Rebo Community Health Center for the suitability and availability of dental materials in the dental polyclinic. The results show that pharmacists can contribute to monitoring and evaluating the suitability of dental materials at the Pasar Rebo Community Health Center, where there were 14 dental procedures and the availability of dental materials had experienced stock shortages in 4 dental materials. The role of pharmacists in managing dental materials can help avoid stock shortages or excesses.
