### Abstrak

This important new book documents a major breakthrough in the treatment of the three most widespread learning disabilities--ADHD, dyslexia, and dyspraxia ("clumsy child syndrome"). Although these conditions have reached epidemic proportions, treatment has been limited to ineffective behavioral therapies or the controversial prescription drug Ritalin. Now Dr. B. Jacqueline Stordy, a leading researcher in the field, reveals a stunning new treatment based on a simple nutritional supplement: LCP (long chain polyunsaturated fatty acids). The LCP Solution is the first book to describe this new natural treatment and to explain how children (and adults) can incorporate it into their daily lives.
