Abstrak

This affordable, full-color review of dermatology grows even stronger in a new second edition that features a completely new section on Serious Skin Signs. 300 of the 400 color illustrations are new, and each illustrations is accompanied by a synoptic review of the etiology, history, physical examination, differential diagnosis and treatment of the corresponding skin disorder. The new coverage of serious, life-threatening skin signs includes AIDS, drug reactions, cutaneous carcinoma, skin signs of systemic cancer, melanoma and much more. In this edition anyone seeing patients with skin disorders has the one convenient source book needed for the identification and differential diagnosis of both the common and the more serious dermatologic conditions.
