[ABSTRAK

Tesis ini mengkaji tentang indikator-indikator yang ideal (I-Deal) dan yang realistik (I-Real), untuk menilai kinerja Jakarta dalam hal Pembangunan Kota Berkelanjutan, khususnya pada periode 2004~2008. Penelitian ini adalah penelitian kuantitatif dengan teknik analisis statistik deskriptif Hasil kajian ini menghasilkan 75 I-Deal dan 50 I-Real. Hal tersebut menunjukkan bahwa indikator-indikator yang ideal, tidak sepenuhnya realistik. Selanjutnya, hasil pengukuran I-Real menunjukkan bahwa dimensi sosial adalah satu-satunya dimensi yang

menurun. Sementara dimensi institusional, lingkungan, ekonomi, dan teknologi, membaik. ini menunjukkan kinerja Jakarta dalam Pembangunan Kota Berkelanjutan, pada periode 2004-2008, mengalami peningkatan.

ABSTRACT

The focus of this thesis is about the development of Ideal Indicators (I-Deal) and Realistic Indicators (I-Real), to value Jakarta performance on Sustainable Urban Development, in 2004-2008. This research is quantitative statistic descriptive.

This research constructed 75 I-Deal and got 50 I-Real. It is reflect that Ideal indicators arennot fully realistic. The measurement of I-Real show that social dimension is the only one dimension which has a degradation.

However,

institutional, environment, economy and technology dimensions, have

improvement. It is concluded that Jakarta has a better performance on Sustainable Urban Development, in

2004~2008.;The focus of this thesis is about the development of Ideal Indicators (I-Deal) and Realistic

Indicators (I-Real), to value Jakarta performance on Sustainable Urban Development, in 2004-2008. This research is quantitative statistic descriptive.

This research constructed 75 I-Deal and got 50 I-Real. It is reflect that Ideal indicators arennot fully realistic.

The measurement of I-Real show that social dimension is the only one dimension which has a degradation.

However,
