

Inside a secret software laboratory: an ethnographic study of a global software package producer

Grimm, Christine, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20397078&lokasi=lokal>

Abstrak

[Christine Grimm presents a first-hand account of a social researcher who entered the software laboratory of one of the biggest ERP providers. Presenting an in-depth ethnography on how people act within such labs. she reveals the highly unexpected social character of programming and shows how the vendor reorganizes himself to find new ways to respond to the expectations of the market. Furthermore, the author highlights the informal practices when an ERP system, as a defective or incomplete product, re-enters the supplier's labs. The book provides a window into what happens if bugs are dug up and emotions on both the supplier and customer sides are running high., Christine Grimm presents a first-hand account of a social researcher who entered the software laboratory of one of the biggest ERP providers.
