Abstrak

ABSTRAK

Keberhasilan suatu program berhubungan dengan kinerja petugasnya. Penelitian ini bertujuan untuk mengetahui kinerja petugas Manajemen Terpadu Balita Sakit (MTBS) dan hubungan antara variabel independen yang terdiri dari faktor individu (umur, masa kerja, pengetahuan dan motivasi), dan faktor organisasi (pelatihan, fasilitas, kepemimpinan) dengan variabel dependen yaitu kinerja petugas MTBS.

Jenis penelitian yang digunakan adalah kuantitatif dengan rancangan penelitian cross sectional. Jumlah sampel 50 responden petugas MTBS. Pengumpulan data dilakukan dengan pengisian kuesioner dan wawancara serta observasi. Pengolahan data dengan menggunakan perangkat lunak computer, analisis data dengan univariat, bivariat dengan uji statistik chi-square dan multivariat dengan uji statistik multipel regresi logistik.

Hasil penelitian menunjukkan bahwa 62% petugas MTBS mempunyai kinerja baik. Terdapat hubungan antara umur, masa kerja, pengetahuan, motivasi, fasilitas dan kepemimpinan dengan kinerja petugas MTBS. Faktor dominan yang mempengaruhi kinerja petugas MTBS adalah masa kerja dan kepemimpinan

ABSTRACT

The success of a program related to the performance of its officers This study aims to determine the performance of Integrated Management of Childhood Illness (IMCI) officers and determine the relationship between the independent variables consisting of individual factors (age, length of work, knowledge and motivation) and organizational factors (training, facilities, leadership) with the dependent variable which is the performance of IMCI officer.

This type of research is quantitative with cross sectional study design. The sample of 50 respondents IMCI officer. Collecting data by filling the questionnaire and interviewing and observation. Processing data using computer software, data analysis with univariate, bivariate statistical test chi-square and multivariate multiple logistic regression statistical test.

The results of this study showed that 62% good performance of IMCI officer. There was correlation between age, length of work, knowledge, motivation, training and leadership with performance of IMCI officer. The

dominant factor affecting performance is the IMCI officers working life and leadership.
