An early crossroad in life is choosing a field of study at the university. This lays the foundation for the rest of our lives. This book records the career choices of the first batch of 557 engineering graduates from the Nanyang Technological Institute (NTI) as NTU was known in 1985. Engineering was then the only discipline offered. The passage of 25 years yielded deep insights as these pioneers reflected on the impact of their engineering education on their careers.
