**The Search Tools.** Gain Control In What You Search For

---

In order to gain control in what you are searching, you will need to have an understanding of the following:

- ✓ Boolean Connectors
- ✓ Wildcards

Understanding the Search Tools

## Boolean Connectors

- Define Relationships between your search terms/words

- **OR** Connector

- Use **OR** when at least one of the terms must appear (such as synonyms, alternate spellings, or abbreviations)
- Eg – statistics **OR** figure

- **AND** Connector

- Use **AND** when all the terms must appear and maybe far apart from each other.
- Eg – market share **AND** starbucks

- **PRE/N** Connector

- Use **PRE/N** when the 1<sup>st</sup> word must precede the 2<sup>nd</sup> word by “N” (1 – 255) words
- Eg – market share **PRE/3** starbucks

- **W/N** Connector

- Use **W/N** to specify the proximity “N” (1 – 255) between the terms
- Eg – market share **W/3** starbucks

## Wildcards

- Symbols / time saving tools

- \* (Asterisk)

➤ Use \* to replace a character / number anywhere in a word except the 1<sup>st</sup> character  
(Eg – wom\*n will find both wom**a**n, wom**e**n) - (Max 7 Asterisk)

- ! (Exclamation)

➤ Use ! To truncate a word to find all the words made by adding letters to the end of it.  
(Eg – employ! n will find employ**e**r, employ**ee**, employ**ment**, employ**ability**)
